TCID PREFERENCE PLANNING SHEET

Before coming to TCID please take time to identify the school corporations or schools you most wish to contact. This may require some amount of research first. In putting your list together, think about how you can efficiently move from table to table, networking with the people you want to see and not wasting time standing in long lines. In other words, have a strategy in mind before TCID, even if you have to change it a little once the Open Networking session is underway. You may wish to state your preferences in terms of high, medium, and low priority by either listing them from top to bottom or indicating their importance to you under the Priority Level column.
